Projects

- **Cozy Corner**

- E-commerce furniture platform with Cloudinary image uploads, pagination, sorting, filtering, discounts, multilingual support (Arabic/English), and dark mode.
- **Technologies:** Angular, MongoDB, Node.js, Express, Bootstrap, JWT, Nodemailer
- **GitHub:** <https://github.com/OmarGTolba/E-Commerce-Node.js-Angular->

- **Blogs**

- Blog website featuring user authentication, post creation and editing, comments, tags, categories, search functionality, pagination, and responsive design.
- **Technologies:** React.js, Nest.js, MongoDB, Tailwind
- **GitHub:** <https://github.com/OmarGTolba/React-Project>

- **Fresh-cart**

- E-commerce platform using API and Angular featuring dynamic product listings, user authentication, real-time inventory management, responsive design, and advanced search and filtering.
- **Technologies:** Angular, API, Bootstrap, Typescript
- **GitHub:** <https://github.com/OmarGTolba/E-commerce>

- **Yummy**

- Comprehensive food menu website with a loading page for enhanced UX, integrated search, contact form, and filters by categories, countries, and ingredients.
- **Technologies:** HTML, CSS, JavaScript, API, Bootstrap
- **GitHub:** <https://github.com/OmarGTolba/Yummy>

- **Quiz App**

- Developed a feature-rich quiz application with real-time feedback indicators to provide users immediate correctness on their answers and incorporated diverse question types and difficulty settings along with random question generation functionality to keep each quiz session unpredictable.
- **Technologies:** HTML, CSS, JavaScript, Bootstrap and jQuery
- **GitHub:** <https://github.com/OmarGTolba/Quiz>

- **Game reviews ()**

- Detailed game reviews covering various aspects and incorporated official links for each game, along with organization into categories for direct resource access and easy navigation
- **Technologies:** HTML, CSS, JavaScript, jQuery, API and Bootstrap.
- **GitHub:** <https://github.com/OmarGTolba/Games-Reviews>

- **Weather**

- weather website that displays current weather conditions and forecasts for three days where users also can search for specific cities to retrieve detailed weather information.
- **Technologies:** HTML, CSS, Bootstrap, and API integration.
- **GitHub:** <https://github.com/OmarGTolba/Weather>

- **Simone (<https://github.com/OmarGTolba/Simone>)**

- Personal portfolio template, crafted solely and designed to be easily customizable to various personal branding needs including sections for introduction, portfolio showcase, testimonials, and contact.
- **Technologies:** HTML, CSS, JavaScript and Bootstrap.
- **GitHub:** <https://github.com/OmarGTolba/Simone>

- **Fokir**

- Sleek template crafted for simplicity and functionality designed to offer a friendly experience suitable for a wide range of purposes, from personal portfolios to business websites.
- **Technologies:** HTML, CSS, JavaScript and Bootstrap.
- **GitHub:** <https://github.com/OmarGTolba/FOKIR>

- **Devfolio**

- Suitable template for showcasing projects, skills, and achievements in a professional visually manner.
- **Technologies:** HTML, CSS, JavaScript and Bootstrap.
- **GitHub:** <https://github.com/OmarGTolba/DEVFOLIO>
